The American Journal of Physiology-Gastrointestinal and Liver Physiology reports the rapid changes taking place in gastrointestinal and liver research. Exciting new developments in the basic concepts of cell and organ function and new approaches in cell and molecular biology are reported while maintaining the traditional focus on physiology.

The journal’s broad scope includes comprehensive coverage of normal and abnormal functions of the gastrointestinal tract, liver, pancreas, gallbladder, and salivary glands. Special features include subject table of contents and theme articles featuring concise, insightful perspectives.

With so many rapid changes taking place in the field, a subscription to AJPGI-Gastrointestinal and Liver Physiology is a must for all serious researchers in this area.

Authors are required to submit papers online at www.apscentral.org.

For Further Information, Contact:
The American Physiological Society
9650 Rockville Pike, Bethesda, MD 20814-3991 (USA)
Tel: 301-634-7180, Fax: 301-634-7418
E-mail: subscriptions@the-aps.org, Web: www.the-aps.org

Special Features
- Sign-up for e-mail notification of advance tables of contents
- Fully searchable text, including PubMed
- Rich color and sharp resolution of figures
- Editor’s Home Page: www.the-aps.org/publications/ajpgi
- Articles in Press: Accepted research papers are now published online within a few days after their acceptance.
- Perpetual/Electronic Archiving: The LOCKSS system preserves the electronic content of all APS journals.

Special APS Member Benefits
- FREE Online Access to the CURRENT content and LEGACY content of APS’s 14 Research Journals: Members of the American Physiological Society (APS) receive FREE online access to both the current content and legacy content (going back as far as 100 years for some journals) of these APS research journals. This free online access includes AJPGI-Gastrointestinal and Liver Physiology.
- FREE Color Figures: Regular and Student Members of APS who are first or last authors receive FREE scientifically necessary color figures in all APS journals.
Call for Papers

American Journal of Physiology-Gastrointestinal and Liver Physiology

Translational Physiology

The American Journal of Physiology-Gastrointestinal and Liver Physiology is soliciting the submission of original manuscripts in the field of Translational Physiology, an area of research that bridges the gap between basic physiology and patient care. Papers in this field may transfer clinical insights into hypotheses that can be tested and validated in the basic research laboratory, or they may transfer knowledge gained from basic research to human physiology or even to improved methods of treating or preventing disease.

The responding authors should indicate in their cover letter that the submitted manuscript is in response to this call for papers. The manuscript will undergo normal peer review. If published, the article will be highlighted as part of the Translational Physiology Series.

If you have any questions or already have a manuscript in this area submitted to the American Journal of Physiology-Gastrointestinal and Liver Physiology and would like to have it included for this series, please contact the Editor, Dr. Marshall Montrose (Phone, 317-278-3674; Fax, 317-278-3840; E-mail, montromh@ucmail.uc.edu).
**CALL FOR NOMINATIONS**

for the Editorship of

*Advances in Physiology Education*

Nominations are invited for the Editorship of *Advances in Physiology Education* to succeed D. U. Silverthorn, who will complete her term as Editor on Dec. 31, 2007. The Publications Committee plans to interview candidates in the Spring of 2007.

Applications should be received before **January 15, 2007**.

Nominations, accompanied by a curriculum vitae, should be sent to the Chair of the Publications Committee:

Kim E. Barrett, Ph.D.
Department of Medicine
University of California, San Diego
San Diego, CA 92103-8414

---

**Attention Authors:**

**Important Information about the NIH Public Access Policy & Your Manuscript**

Under the NIH Public Access Policy, NIH is asking its funded investigators to voluntarily submit to PubMed Central (PMC) the author’s final manuscript of articles resulting from research supported in whole or in part with direct costs from NIH. According to the NIH, this policy applies only to manuscripts accepted for publication on or after May 2, 2005.

If you choose to submit your accepted manuscript to PMC, you will be asked to indicate when that manuscript should be made available to the public. As copyright holder of your article, the APS has the sole right to publish or disseminate it. However, the APS grants you permission to allow public release of your manuscript through PMC 12 months after publication in the print version of an APS journal.

This period of time is consistent with our existing policy to make all content publicly available through HighWire Press 12 months after print publication. NIH will be able to determine when 12 months have elapsed because APS sends NIH electronic feeds of the article metadata upon publication in a journal issue. Therefore, you can submit your accepted manuscript to PMC at the time of acceptance to an APS journal, and will not have to calculate or track time elapsed from publication.

NIH intends to use the PMC database of manuscripts for portfolio management; to create a permanent archive of articles based upon NIH-funded research; and to give the public access to research publications. In announcing this policy, NIH officials underscored that it is voluntary and there will be no sanctions of any kind against authors who do not submit their manuscripts. **If you have any questions with respect to the NIH Public Access Policy and the publication of your article in an APS journal, please contact Margaret Reich at mreich@the-aps.org.**
### PAST THEMES

**Lipid Metabolism and Liver Inflammation**

- **Feb. 2006**  Hepatic fatty acid uptake: possible role in steatosis  M. W. Bradbury
- **May 2006**  Fatty liver disease and fatty acid oxidation  J. K. Reddy and M. S. Rao

**Mechanisms of Liver Injury**

- **Apr. 2006**  TNF-α-induced liver injury: role of IKK, JNK, and ROS pathways  R. F. Schwabe and D. A. Brenner
- **Jun. 2006**  Mechanisms of neutrophil-induced liver cell injury during hepatic ischemia-reperfusion and other acute inflammatory conditions  H. Jaeschke
- **Jul. 2006**  Role of glutathione redox status in liver injury  D. Han, N. Hanawa, B. Saberi, and N. Kaplowitz

### CURRENT THEMES

**Taste Receptors in the Gastrointestinal Tract**

- **Aug. 2006**  Bitter taste receptors and α-gustducin in the mammalian gut  E. Rozengurt
- **Nov. 2006**  t-Amino acid-sensing by calcium-sensing receptors: implications for GI physiology  A. Conigrave and E. M. Brown
- **Dec. 2006**  Salty and sour taste: sensing of sodium and protons by the tongue
  - Functional role of bitter taste receptors  C. Sternini
  - Sweet taste receptors  S. Shirazy-Beechey
  - Acid sensing in the GI tract  P. Holzer

**Differentiation of the Gastric Mucosa**

- **Oct. 2006**  Role of histamine in control of gastric mucosal integrity of oxyntic mucosa: understanding gastric physiology through disruption of targeted genes  D. Chen, T. Aihara, C.-M. Zhao, R. Hakanson, and S. Okabe
- **Nov. 2006**  Role of gastrin in gastric epithelial cell proliferation and maturation  R. Jain and L. Samuelson
- **Dec. 2006**  Animal models of oxyntic atrophy and metaplasia  J. R. Goldenring and S. Nomura
  - Role of trefoil peptides and Il-6-cytokine family signaling in gastric homeostasis  A. S. Giraud, C. Jackson, T. R. Menheniott, and L. M. Judd
