The American Journal of Physiology-Gastrointestinal and Liver Physiology reports the rapid changes taking place in gastrointestinal and liver research. Exciting new developments in the basic concepts of cell and organ function and new approaches in cell and molecular biology are reported while maintaining the traditional focus on physiology.

The journal's broad scope includes comprehensive coverage of normal and abnormal functions of the gastrointestinal tract, liver, pancreas, gallbladder, and salivary glands. Special features include subject table of contents and theme articles featuring concise, insightful perspectives.

With so many rapid changes taking place in the field, a subscription to AJP-Gastrointestinal and Liver Physiology is a must for all serious researchers in this area.

Authors are required to submit papers online at www.apscentral.org.

For Further Information, Contact:
The American Physiological Society
9650 Rockville Pike, Bethesda, MD 20814-3991 (USA)
Tel: 301-634-7180, Fax: 301-634-7418
E-mail: subscriptions@the-aps.org; Web: www.the-aps.org

Special Features

- Sign-up for e-mail notification of advance tables of contents
- Fully searchable text, including PubMed
- Rich color and sharp resolution of figures
- Editor's Home Page: www.the-aps.org/publications/ajpgi
- Articles in Press: Accepted research papers are now published online within a few days after their acceptance.
- Perpetual/Electronic Archiving: The LOCKSS system preserves the electronic content of all APS journals.

Special APS Member Benefits

- FREE Online Access to the CURRENT content and LEGACY content of APS's 14 Research Journals: Members of the American Physiological Society (APS) receive FREE online access to both the current content and legacy content (going back as far as 100 years for some journals) of these APS research journals. This free online access includes AJP-Gastrointestinal and Liver Physiology.
- FREE Color Figures: Regular and Student Members of APS who are first or last authors receive FREE scientifically necessary color figures in all APS journals.
The American Physiological Society has changed the mail dates for the print journals effective January 2007.

In order to synchronize the issue month with the mail date, the journals will now mail within the month of issue.

Beginning January 2007, the January print issue of the APS journal you subscribe to will mail in January, rather than in the last two weeks of December, as it did in 2006. The online version will be posted the first week of January instead of mid-December as it did previously.

You will experience receiving the journals later than usual, but we want to assure you that you will receive them within the month of issue.

Should you need assistance, please contact Customer Service at: subscriptions@the-aps.org or 301-634-7180, Monday – Friday, 8:30 a.m. - 5:30 p.m. EST.

Thank you for subscribing.
LATE BREAKING CALL FOR ABSTRACTS
Deadline for Submission: Wednesday, February 28, 2007
www.eb2007.org

Late-breaking abstracts will be accepted beginning Monday, December 4, 2006. The abstracts will be accepted for poster presentations only and scheduled in poster sessions on Wednesday, May 2, 2007.

Late-breaking abstracts will be published in an addendum to the meeting program. The abstracts will also be published in the online version of The FASEB Journal.

Late-breaking abstracts must be submitted online at www.eb2007.org with the $90 abstract fee by Wednesday, February 28, 2007.

For information about the meeting including topic categories for late-breaking abstracts, preliminary program, housing, and registration go to www.eb2007.org. If you have questions, Contact eb@faseb.org.

!!Save Money!!
Register online by March 2, 2007 and complete your hotel reservations by March 23, 2007

Attention Authors:

Important Information about the NIH Public Access Policy & Your Manuscript

Under the NIH Public Access Policy, NIH is asking its funded investigators to voluntarily submit to PubMed Central (PMC) the author's final manuscript of articles resulting from research supported in whole or in part with direct costs from NIH. According to the NIH, this policy applies only to manuscripts accepted for publication on or after May 2, 2005.

If you choose to submit your accepted manuscript to PMC, you will be asked to indicate when that manuscript should be made available to the public. As copyright holder of your article, the APS has the sole right to publish or disseminate it. However, the APS grants you permission to allow public release of your manuscript through PMC 12 months after publication in the print version of an APS journal.

This period of time is consistent with our existing policy to make all content publicly available through HighWire Press 12 months after print publication. NIH will be able to determine when 12 months have elapsed because APS sends NIH electronic feeds of the article metadata upon publication in a journal issue. Therefore, you can submit your accepted manuscript to PMC at the time of acceptance to an APS journal, and will not have to calculate or track time elapsed from publication.

NIH intends to use the PMC database of manuscripts for portfolio management; to create a permanent archive of articles based upon NIH-funded research; and to give the public access to research publications. In announcing this policy, NIH officials underscored that it is voluntary and there will be no sanctions of any kind against authors who do not submit their manuscripts. If you have any questions with respect to the NIH Public Access Policy and the publication of your article in an APS journal, please contact Margaret Reich at mreich@the-aps.org.
### CURRENT THEMES

#### Taste Receptors in the Gastrointestinal Tract

<table>
<thead>
<tr>
<th>Date</th>
<th>Topic</th>
<th>Authors</th>
</tr>
