The consolidated American Journal of Physiology (AJP) ranks as one of the most frequently cited publications among all physiology journals listed in the Journal Citation Index. Published in two monthly volumes by The American Physiological Society, the consolidated AJP brings you approximately 2,700 articles encompassing over 22,000 pages annually.

The consolidated edition of the AJP provides comprehensive coverage of the latest research published in these important specialty journals:

- Cell Physiology
- Endocrinology and Metabolism
- Gastrointestinal and Liver Physiology
- Lung Cellular and Molecular Physiology
- Heart and Circulatory Physiology
- Regulatory, Integrative and Comparative Physiology
- Renal Physiology

As your comprehensive source for the full spectrum of current physiological research at a single low subscription price, the consolidated AJP is an unbeatable value.
The American Physiological Society publishes online—within only days after their acceptance—peer-reviewed papers submitted to our prestigious research journals. Articles in PresS dramatically reduce time to publication.

APS Articles in PresS are citable, searchable in PubMed, and will establish publication priority. These articles are published in PDF format and reflect the original, unedited, accepted version, as submitted by the author.

Once a paper is published online as an Article in PresS, it proceeds through the established course of thorough copyediting and production, leading to its publication (about 9 weeks later) in the final online and print editions of the appropriate APS Journal. This final version will bear the date, volume, and page numbers as well as the Articles in PresS publication date and identifier, called the DOI.

After the journal issue is published online and in print, the final version of the paper will come up on search while the Articles in PresS version will be stored in an accessible, permanent archive.
