Supplemental Figure 1

(A) Representative images of the thymus (left) and spleen (right) from mice treated with Vehicle or LY411,575.

(B) Bar graphs showing the total cell count (x10^7 cells/body) in the thymus and spleen. The bar on the left indicates significant difference (*) compared to Vehicle.

(C) Histological images of the thymus and spleen from mice treated with Vehicle or LY411,575.

(D) Graph showing the percentage of total cell count (% Total Cell) in the thymus and spleen. The bars indicate significant difference (*) compared to Vehicle.

(E) Graph showing the cell count (x10^7 cells/body) in the thymus and spleen. The bars indicate significant difference (*) compared to Vehicle.
